JAMAICA BLUE MOUNTAIN

JBM: the most famous and prestigious gourmet coffee variety in the world. It originates from plantations in volcanic lands up to 2000 m of altitude, in the highest regions of the island, also called Blue Mountain. The most famous one comes from the legendary Wallenford Estate, which is now a guarantee of high quality and care throughout all the stages of production and processing: from harvesting, which is carried out by hand to pick up only red ripe cherries, to the complex wet processing system, through to final selection.

Tasting notes

When tasting this liqueurish Gran Cru coffee, we can perceive heady notes of Caribbean rums, enriched by scents of vanilla, melted butter and delicate fragrances of chocolate and tobacco leaves. Its main distinguishing feature is its thoroughness and its balance.
